But I need to program an ATTiny so I purchased an FTDI BASIC from Sparkfun --- and the fun began.. The solution is to move the FTDI driver which Arduino installed into the correct folder.. I then installed the FTDI driver from FTDIs site: as mentioned in the Sparkfun install guide: But this did not help.. Each TTL-232R cable contains a small internal electronic circuit board, utilising the FT232R, which is encapsulated into the USB connector end of the cable.. I did find the Apple driver in SystemLibraryExtensionsAppleUSBFTDI kext But I was not able to remove it, even with a sudo operation in terminal.. kext Ive re-read the original post about what needed to be done but I cannot tell if he actually ended up having done anything at all in the end. 773a7aa168 Heroes Of Might And Magic 3 For Mac Torrent
